**PARENT / GUARDIAN INFORMATION PRIOR TO TREATMENT**

Changes to the law now require all practitioners who manipulate the spine to warn patients of the material risks. In extremely rare circumstances, it is possible to exacerbate a condition. All techniques employed are gentle and safe, and manipulations on children are provided with extreme care.

Chiropractic adjustments (manipulation) of the spine are internationally recognised as being far safer in dealing with neck and low back pain than medication and many other alternatives (A Risk Assessment of Cervical Manipulation, JMPT, 1995. Manga Report, Ontario Ministry of Health, 1993).

If you have any questions relating to the treatment your child is about to receive, please speak to the chiropractor. If you understand the above information and give your consent to treatment please sign below.
